2.1 Deferred Changes..... 4

**3.0 IMPACT & EXCEPTIONS ..... 4**  
3.1 Impacts to the MSIX Environment:..... 4  
3.2 Deviations from the Test Plan..... 4  
3.3 Known Issues ..... 4  
3.4 Known Workarounds ..... 4

**4.0 DATE/TIME OF OUTAGE..... 4**

**5.0 RELEASE RECOMMENDATION ..... 4**

**6.0 CCB DETAILS ..... ERROR! BOOKMARK NOT DEFINED.**

## Document History

Version	Date	Author	Status	Notes
0.5	02-18-2008	Wahid Sadek	Draft	Initial Draft
1.0	02-26-2008	Wahid Sadek	Update	Additional Functionality

## 1.0 How to Read This Document

The release description is separated into several sections. The purpose of the document is to outline the test recommendation on whether or not to proceed with the next planned step in deployment, whether that is to an acceptance test phase or to production. Additionally, the release details are outlined in the other sections. The major sections and their purpose are outlined below:

- **Delivered Functionality** – All requests scheduled for the target point release.
- **Impacts to the MSIX Environment** – This section summarizes the review of all aspects of the MSIX environment and their impact on the release.
- **Deviations from the Test Plan** – This section lists areas where the test plan and/or approach were modified during the course of the project to accommodate project or program changes. If one area necessitated more or less attention than planned, that would be outlined here.
- **Known Issues** – Issues that exist at the time of the release. These would coincide with the Recommendation Type.
- **Known Workarounds** – Workarounds that exist in conjunction with the Known Issues.
- **Recommendation** – This section summarizes the recommendation by the test organization on whether to proceed or not. The recommendation will prompt the reader whether it is necessary to read in-depth further in the document to make a business decision to proceed, although it is always recommended to read the entire document before proceeding. The options for recommendation are:
  - Release with No Issues
  - Release with Minor Issues
  - Release with Major Issues
  - Do Not Release
- **CCB Prioritization Details** – CCB (Change Control Board) prioritization meeting dates and who attended.

## 2.0 Delivered Functionality

Release Item #	Short Description
1	Port SQL from Java to PL/SQL
2	Rules of Behavior webpage in MSIX showing line of HTML
3	Update Report Links for Data Report
4	Enhanced Logging Infrastructure
5	User Initiated Split Real-Time
6	UNIQ-ID patch to encrypt internal password

7  
8

MSIX User Password Reset Enhancement  
Search Function in User Administration

## 2.1 Deferred Changes

The following changes were deferred to a later release, to allow complete testing and review.

None of the functionalities are deferred.

## 3.0 Impact & Exceptions

### 3.1 Impacts to the MSIX Environment:

Impacts to the environment were reviewed. Additional details can be found in MSIX Release 0202 Content Review.xls.

### 3.2 Deviations from the Test Plan

No deviations were reported.

### 3.3 Known Issues

There is an issue with the installation of the UNIQ-ID security patch that would require the help of the eScholar technical team to be available during installation. The eScholar technical team is available during normal business hours that are outside the MSIX maintenance window.

### 3.4 Known Workarounds

The UNIQ-ID security patch can be applied when the eScholar technical team is available to assist. This will require the installation to be done outside the MSIX maintenance window and during the MSIX operating hours.

## 4.0 Date/Time of Outage

03/01/2008 12:01 AM – 03/03/2008 05:00 AM EST

## 5.0 Release Recommendation

Release To:	Recommend Yes/No	Recommendation Type
Production	Yes	Release with No Issues
