 3.2 Deviations from the Test Plan..... 4

 3.3 Known Issues 4

 3.4 Known Workarounds 4

4.0 DATE/TIME OF OUTAGE..... 5

5.0 RELEASE RECOMMENDATION 5

1.0 How to Read This Document

The release description is separated into several sections. The purpose of the document is to outline the test recommendation on whether or not to proceed with the next planned step in deployment, whether that is to an acceptance test phase or to production. Additionally, the release details are outlined in the other sections. The major sections and their purpose are outlined below:

- **Delivered Functionality** – All requests scheduled for the target point release.
- **Impacts to the MSIX Environment** – This section summarizes the review of all aspects of the MSIX environment and their impact on the release.
- **Deviations from the Test Plan** – This section lists areas where the test plan and/or approach were modified during the course of the project to accommodate project or program changes. If one area necessitated more or less attention than planned, that would be outlined here.
- **Known Issues** – Issues that exist at the time of the release. These would coincide with the Recommendation Type.
- **Known Workarounds** – Workarounds that exist in conjunction with the Known Issues.
- **Recommendation** – This section summarizes the recommendation by the test organization on whether to proceed or not. The recommendation will prompt the reader whether it is necessary to read in-depth further in the document to make a business decision to proceed, although it is always recommended to read the entire document before proceeding. The options for recommendation are:
 - Release with No Issues
 - Release with Minor Issues
 - Release with Major Issues
 - Do Not Release

2.0 Delivered Functionality

AMPM Request	Short Description
184590	While In User Reports - Only Seeing Three Users Not From Her State
194191	MSIX User Reports to display total count of unique users and worklists
195357	Labels not appearing in the MSIX Reports filter dialog
199308	Formatting issues in the PDF print version of the user account report
201112	MSIX Worklist Report Modification
202445	PA requested modification to the worklist reports to include contact information of the assigned user
202794	User sees listing for Vermont users in user account reports instead of Virginia
209087	Worklist Escalation and Auto-Validation
209092	Implement FLEX reports based on SQL OME Reports
209493	Make OME reports available to State users
209497	Allow OME reports to be filtered by State
212349	In MSIX, the enrollment type 01 (Basic School Program) is displayed as Regular School

2.1 Deferred Changes

The following changes were deferred to a later release, to allow complete testing and review.

- No deferred changes

3.0 Impact & Exceptions
