3.3 Known Issues	4
3.4 Known Workarounds	4
4.0 DATE/TIME OF OUTAGE.....	5
5.0 RELEASE RECOMMENDATION	5

1.0 How to Read This Document

The release description is separated into several sections. The purpose of the document is to outline the test recommendation on whether or not to proceed with the next planned step in deployment, whether that is to an acceptance test phase or to production. Additionally, the release details are outlined in the other sections. The major sections and their purpose are outlined below:

- **Delivered Functionality** – All requests scheduled for the target point release.
- **Impacts to the MSIX Environment** – This section summarizes the review of all aspects of the MSIX environment and their impact on the release.
- **Deviations from the Test Plan** – This section lists areas where the test plan and/or approach were modified during the course of the project to accommodate project or program changes. If one area necessitated more or less attention than planned, that would be outlined here.
- **Known Issues** – Issues that exist at the time of the release. These would coincide with the Recommendation Type.
- **Known Workarounds** – Workarounds that exist in conjunction with the Known Issues.
- **Recommendation** – This section summarizes the recommendation by the test organization on whether to proceed or not. The recommendation will prompt the reader whether it is necessary to read in-depth further in the document to make a business decision to proceed, although it is always recommended to read the entire document before proceeding. The options for recommendation are:
 - Release with No Issues
 - Release with Minor Issues
 - Release with Major Issues
 - Do Not Release

2.0 Delivered Functionality

AMPM Request	Short Description
354713	MSIX Reports Dashboard
420300	Worklist Aging report data grid disappears when horizontal scroll bar is used.
458731	Email address appears truncated at the single quote
470533	Update MSIX Implementation Status" map / key
507226	Remove spaces & comma in Temporary password e-mail
507227	When a drill-down report is downloaded into Excel, the name of the Data Element that was drilled-down should be included in the header information
